

Daily baby feeding log

Write down what happened, not a feeding target. Fill this PDF locally in a compatible viewer, or print it blank.

Date:

Initials (optional):

Time	Breast (L/R, min)	Bottle (ml/oz)	Observation / caregiver

Use one unit for bottle amounts and record the amount taken. Blank rows are not a required number of feeds. Bring questions to your care team.

This record does not assess milk intake, growth or hydration. Follow your clinician's feeding advice. Protect completed copies: they can contain private health information.
